

CYRIL MARTIN

+91 7204017793 | cyrilmartin.tech@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

Skills

Languages: Java, Python, JavaScript, C++, C

Frameworks: React, Next.js, React Native, Express.js

Databases: MongoDB, MySQL

Enterprise Technologies: Microsoft SharePoint Online, Microsoft 365, Power Automate, Microsoft Copilot Studio, Microsoft Power Platform

Developer Tools: Git, GitHub, Postman, VS Code, Figma, Power BI, Tableau, Canva, LaTeX

Libraries: pandas, NumPy, OpenCV, Firebase, Expo

Soft Skills: Leadership, Problem-solving, Communication, Teamwork

Education

Information Science & Engineering — Cambridge Institute of Technology, Bengaluru CGPA: 8.53 — 2026

XII (PUC) — St. Joseph's PU College, Bengaluru 89.5% — 2022

X (ICSE) — New Millennium School, Bengaluru 94.4% — 2020

Experience

- **Tax, Technology & Transformation Intern – EY GDS** (Jan 2026 – Present)
 - Delivered 115+ Microsoft SharePoint Online sites by designing document libraries, custom lists, metadata structures, permissions, and reusable site components.
 - Developed and maintained Power Automate workflows to automate document approvals, notifications, and business processes, improving operational efficiency.
 - Collaborated with business stakeholders to gather requirements and implement scalable SharePoint and Microsoft 365 solutions aligned with business needs.
 - Enhanced enterprise information management through structured content architecture, metadata-driven organization, and customized SharePoint configurations.
 - Built AI-powered conversational agents using Microsoft Copilot Studio as part of a proof-of-concept, supporting enterprise AI automation initiatives.

Technologies: Microsoft SharePoint Online, Microsoft 365, Power Automate, Microsoft Copilot Studio, Microsoft Power Platform
- **Software Developer Intern – TH Works [Remote]** (Feb 2025 – Apr 2025)
 - Collaborated directly with the founder to design wireframes, interactive prototypes, and user interfaces for a fintech lending application using Figma.
 - Developed frontend prototypes using v0.dev, enabling rapid UI iteration and feature validation during early-stage product development.
 - Contributed to the implementation and testing of authentication workflows for a professional networking application, including social login integration.
 - Participated in UI validation, usability testing, and iterative feature refinement within a lean startup environment.
- **Contributor — GirlScript Summer of Code [Remote]** (May 2024 – Aug 2024)
 - Ranked 814 out of 27,000+ participants globally in the program.
 - Contributed bug fixes and enhancements via GitHub — merged a pull request and opened 8+ meaningful issues.
- **Summer Intern – Anay Group [Remote]** (May 2024 – July 2024)
 - Developed an MVP for a dating app using the no-code platform Adalo, implementing core matchmaking features and refining the user flow.
 - Focused on optimizing UI components, integrating essential app functionalities, and ensuring a smooth user experience.

Projects

- **Cyril's Chaats – Full Stack Food-Ordering Web App** [\[Live\]](#) [\[GitHub\]](#)
 - Developed a full-stack food ordering platform with dynamic order form, QR code UPI payments, and MongoDB Atlas for persistent order and transaction management.
 - Designed RESTful APIs using Node.js, implemented secure environment variable management, and deployed the application on Vercel.

Tech Stack: Node.js, MongoDB Atlas, REST API, Vercel
- **PicTune – AI Mood & Music Matcher** [\[Live\]](#) [\[GitHub\]](#)
 - Built a responsive AI-powered web app that analyzes images/videos to detect emotional moods and recommends matching music tracks.
 - Integrated facial emotion detection using OpenCV, color-based mood analysis using ColorThief and NumPy, and responsive design with Streamlit and CSS.

Tech Stack: Python, Streamlit, OpenCV, ColorThief, NumPy, CSS
- **CITech Buzz – Notification App** [\[GitHub\]](#) [\[Demo\]](#)
 - Built a React Native mobile application to deliver real-time academic and event notifications for college students.
 - Integrated Expo for rapid development and testing, enabling seamless cross-platform deployment and notification workflows.

Tech Stack: React Native, JavaScript, Expo

- **AI-Enabled Wildlife Detection & Alerting System (IEEE ICECST 2025)** [\[Colab\]](#)
 - Developed an AI-powered wildlife detection system leveraging the Google Gemini API to identify wild animals from images and video inputs.
 - Implemented automated detection alerts by displaying the detected animal, recording the detection timestamp, and triggering an audible alert for real-time awareness.**Tech Stack:** Python, Google Gemini API, OpenCV, Computer Vision

Publications

AI-Enabled Wildlife Detection and Alerting System for Forest-Adjacent Villages

[\[IEEE Xplore\]](#)

Published in *IEEE ICECST 2025*, Petaling Jaya, Malaysia

Positions of Responsibility

- **Core Team Member (Development) — Google Developer Student Club (GDSC), CIT** (Dec 2023 – Jun 2024)
 - Organized hackathons and technical sessions for 350+ students on emerging technologies and software development practices.
 - Collaborated with the leadership team to plan and execute developer-focused community initiatives.
- **Cultural Coordinator & College Band (Hindustani Flautist) — CIT** (Dec 2022 – Jun 2026)
 - Coordinated intra- and inter-college cultural events by collaborating with student teams, faculty members, and organizers to ensure successful execution.
 - Performed as a Hindustani flautist representing the college at cultural events and institutional programs, strengthening public performance and teamwork skills.

Certifications

- **Evaluation and Light Customization of LLMs** (NVIDIA)
- **Advanced Microsoft 365 Copilot AI** (Coursera)
- **Build and Use AI Agents** (Coursera)
- **Build an NLP Solution with Azure AI** (Microsoft)
- **Boost Your Productivity with GitHub Copilot** (Microsoft, Coursera)
- **Agile Software Development** (University of Minnesota, Coursera)
